WHAT WE BUILT

A simple way to track all 515 sewing machines — their documents, spare parts, and maintenance — from any phone or computer, with no software to install.

1

Scan to open

Each machine has a QR code. Scan it with a phone camera to open that machine's documents instantly.

2

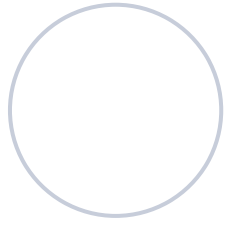

Records & files

Spare parts, maintenance checklists, and catalog PDFs — all kept per machine, editable on the spot.

3

Dashboard & export

See what maintenance is overdue, track activity, and export to CSV or Excel for reporting.

HOW IT WORKS

SCAN → VIEW → UPDATE

The same simple flow for everyone on the floor — no login, no training needed.

1

SCAN

Point a phone camera at the machine's QR label.

2

OPEN

The machine's page opens automatically in the browser.

3

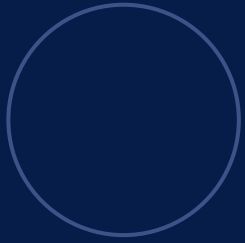

VIEW

See its catalog, spare parts, and maintenance history.

4

UPDATE

Add a part or a maintenance record — saved instantly.

BY THE NUMBERS

515

Machines tracked

479 stock + 36 rental

352

Machines with catalogs

13 model catalogs linked

6

Maintenance checks

Mechanic monthly checklist

How your products are made, matters.

TWO APPS, ONE SYSTEM

Machine Documents

LIVE
